### Naturally Fortifying Enhancement Systems

**Enhansys™** is a versatile and cost effective approach for fortifying and enhancing Personal Care product formulations. Use **Enhansys™** for the formulation performance functionalities of conditioning, moisturization, thickening, stabilizing and pH control, and find that traditional preservatives are not needed. **Enhansys™** fortified formulations are self-preserving systems that enable a high level of protection against in-package biodegradation resulting from manufacturing contamination, process water, raw materials and/or environment.

<b>Product</b>	<b>INCI Name</b>	<b>Description/Attributes</b>
<b>Enhansys C-110</b>	<b>Gluconic acid and Glucono Delta Lactone and C4-18 Perfluoroalkylethyl Thiohydroxypropyltrimonium Chloride</b>	Gluconic acid is a polyhydroxy acid (PHA) that functions as an Exfoliant; Glucono Delta Lactone is an effective Moisturizer and useful in pH Control; C4-18 Perfluoroalkylethyl Thiohydroxypropyltrimonium Chloride is an ultra efficient Stabilizer, Hair and Skin Conditioning Agent.
<b>Enhansys C-120</b>	<b>Glucono Delta Lactone and C4-18 Perfluoroalkylethyl Thiohydroxypropyltrimonium Chloride</b>	Glucono Delta Lactone is an effective Moisturizer and useful in pH Control; C4-18 Perfluoroalkylethyl Thiohydroxypropyltrimonium Chloride is an ultra efficient Stabilizer, Hair and Skin Conditioning Agent.
<b>Enhansys M-100</b>	<b>Glycereth-2 Cocoate and Benzoic Acid</b>	Glycereth-2 Cocoate is an effective Moisturizer and Thickener; Benzoic Acid is useful in pH Control.
<b>Enhansys M-110</b>	<b>Glycereth-2 Cocoate and Benzoic Acid and C4-18 Perfluoroalkylethyl Thiohydroxypropyltrimonium Chloride</b>	Glycereth-2 Cocoate is an effective Moisturizer and Thickener; Benzoic Acid is useful in pH Control; C4-18 Perfluoroalkylethyl Thiohydroxypropyltrimonium Chloride is an ultra efficient Stabilizer, Hair and Skin Conditioning Agent.
