

Maquat[®] C-15MS

PEG-15 Cocomonium Methosulfate

Overview

MAQUAT C-15MSMS is a 95% active PEG-15 cocomonium methosulfate. With its unique substantive, lubricating, detangling, anti-static and anionic compatible foaming properties, C-15MS is a superior product for use in wide range of products including: 2-in-1 shampoos, restorative conditioners, conditioning hairspray, crèmes and lotions.

With over 35 years quat manufacturing experience and using the highest quality raw materials, MAQUAT C-15MS is reliably consistent batch to batch.

MAQUAT C-15MS is based on the renewable vegetable lipid found in coconut oil, making it a uniquely natural compliment for use in hair conditioners and rinses, skin crèmes and lotions. C-15MS improves dry comb and fly away, while building volume and sheen, especially with colored, permed, sun dried and damaged hair. In other applications, use Maquat C-15MS as a cationic emulsifier, and as an anti-static and softening agent in crèmes, lotions and other personal care products.

INCI Name: PEG-15 Cocomonium Methosulfate

Typical Properties

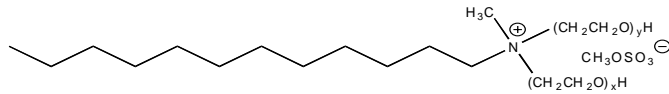

Water solubility.....	Soluble
Physical form.....	Viscous liquid
Color (Gardner).....	11 Maximum
Active quaternary (m.w. 911).....	95% Minimum
Specific gravity (25°C).....	1.08±0.04
pH (10% aq.).....	7.0-9.0
Flash point.....	>200°F (PMCC)

Handling Information

Refer to the Material Safety Data Sheet (MSDS) available from Mason Chemical Company for information on the safe use, handling and disposal of this product.

Maquat, Macat and Masurf are Registered Trademarks of Mason Chemical Company.

Maquat® C-15MS

MAQUAT C-15MS is a 95% active PEG-15 cocomonium methosulfate in water. With its unique substantive, anti-static, emulsifying and anionic compatible foaming properties, C-15MS is an excellent product for use in wide range of products including: 2-in-1 shampoos, restorative conditioners, conditioning hairspray, crèmes and lotions.

MAQUAT C-15MS is based on the renewable vegetable lipid found in coconut oil, making it a uniquely natural compliment for use in hair conditioners and rinses, skin creams and lotions. C-15MS improves dry comb and fly away, while building volume and sheen, especially with colored, permed, sun dried and damaged hair. In Shampoo and Conditioner formulations, Maquat C-15MS imparts superior conditioning properties for differentiated products, as the formulations below illustrate:

2-in-1 Shampoo

Ingredients:	Wt. %
Water.....	to 100.00
Sodium laureth-2 sulfate (26%)	25.0
Sodium lauryl sulfate (28%)	25.0
Macat Ultra CDO	5.0
Maquat C-15MS	2.5
Fragrance	q.s
Extracts/Oils	q.s.
Preservative	q.s.

Procedure:

- Charge materials into water with agitation in order.
- Add Fragrance, Extracts/Oils such as Aloe Vera, Chamomile and Jojoba, and Preservative.

Detangling Hair Conditioner for Damaged Hair

Ingredients:	Wt. %
Part A	
Water.....	to 100.00
Maquat CETAC-30%	0.5
Maquat C-15MS	1.5
Part B	
Cetearyl alcohol	2.5
Maquat BTMC-85%	2.0
Masurf LL	1.0
C13-14 Isoparaffin.....	1.0
Part C	
Propylene glycol.....	1.0
Fragrance.....	q.s
Extracts/Oils	q.s.
Preservative	q.s.

Procedure:

- Part A: Mix water and CETAC-30% and C-15MS, heat to 65°C.
- Part B: Mix components, heat to 65°C.
- Mix Part B into Part A, and hold for 30 minutes, Cool to 45°C, add Part C.
- Add Fragrance, Extracts/Oils such as Aloe Vera, Chamomile and Jojoba, and Preservative.

Damaged hair, especially permed hair can be difficult to comb, especially when wet. Hair Conditioner products are generally oil-in-water emulsions in which the lipophilic conditioning quaternium ammonium salt is the active ingredient. The conditioning quat, along with the fatty alcohols impart wet-comb performance to the formulation. The superior substantive and lubricating properties of Maquat C-15MS over other conditioning cationics significantly improves wet comb performance of these formulas, and others of their type, especially on damaged hair.
